DETAILED ACTION

Claim Objections

1. Claim 4 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim 3. See MPEP § 608.01(n). Accordingly, the claim 4 not been further treated on the merits.

Claim Rejections - 35 USC § 112

1. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. The following claims lack proper antecedent basis:

i. "the type" in claims 1 and 5. This is first mention of this term because it appears here first. Therefore the term lack antecedent basis.

b. The following claims are vague, indefinite, awkwardly, and confusingly worded:

ii. The dependent claims 2-4 and 6-7 state "according to the preceding claim" there is no claim number identify which claim is dependent from which claim. This vague because in some cases there is more than one claim preceding. Applicant should use claims numbers.

Claim Rejections - 35 USC § 102

Art Unit: 3723

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by DeRees et al (5408719).

DeRees et al disclose a method and apparatus having a link (12&132), a crank (16), a body (166&156&154), and the length can be modified by adjusting 132 which will adjust the body.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over DeRees et al (5408719).

- c. DeRees et al disclose the claimed method and apparatus except for deforming the body to make it shorter.
- d. The claim of deforming the apparatus by deforming the body would have been obvious because a person of ordinary skill has good reason to pursue the known option within his or her technical grasp. If this leads to the anticipated

success, It is likely the technique of bending the part is not the product of innovation but of ordinary common sense. (KSR) It is also notoriously well known that deforming or bending parts will make them shorter.

Allowable Subject Matter

6. Claims 6-7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The 892 form discloses prior art being made of record.
